
Schedule an Advising Appointment
Scheduling an appointment with our Academic Advisor can be done online.
Visit One.IU.edu, search “SAS” and save it as a favorite. This link will direct you to the online appointment scheduler. If you have any questions, please contact Ashley Burelson at abhblank@iu.edu.

Life Health Science Internship (LHSI) Applications Now Open

The Life-Health Sciences Internship Program is now accepting applications for the 2017-2018 academic year. We are looking for current first and second year IUPUI undergraduate students who will graduate no sooner than May 2018. Students are available online at: https://shrs.iupui.edu/academics/graduation-commencement/application-degree-completion.html.

Graduating this year? You are REQUIRED to apply online in order to be approved and receive your diploma. Applications are available online at: https://shrs.iupui.edu/academics/graduation-commencement/application-degree-completion.html.

MDA Summer Camp Counselors Needed

As part of MDA’s mission to save and improve the lives of people fighting muscle disease, MDA provides a summer camp program for kids ages 6-17 — offered at no cost to their families. Each year, nearly 200 kids with muscle disease in Indiana attend MDA Summer Camp at Bradford Woods in Martinsville, IN and Camp Potawotami in Wolcottville, IN. Kids look forward to MDA camp year-round, and they almost all agree “it’s the best week of the year.”

MDA summer camp opens up a world of possibilities and hope to kids with muscle disease who often experience limitations in life and daily activities. Kids living with muscle disease face many unique challenges. Muscle disease progressively weakens muscles, often taking away everyday abilities like running, walking, hugging and even breathing.

MDA summer camp is a magical place where anything is possible for these special kids, but MDA needs caring people to volunteer as camp counselors. MDA relies on the support and dedication of volunteer counselors who are by campers’ sides day and night so that they can do all the fun activities that summer camp offers. Counselors serve as a “buddy” for the week and participate in activities with the campers. They push wheelchairs, lift and transfer youngsters and provide assistance with daily living activities as needed.

In addition to bringing joy to our campers, this is an amazing opportunity for students in your class to gain hands-on experience in education, recreation, family social sciences and medical professions. As camp volunteers, they will acquire a week of experience working with children living with neuromuscular disease, as well as 140 volunteer hours. MDA staff and the camp medical team provide all of the medical training your volunteers, they will acquire a week of experience working with children living with neuromuscular disease, as well as 140 volunteer hours. MDA staff and the camp medical team provide all of the medical training your volunteers, they will acquire a week of experience working with children living with neuromuscular disease, as well as 140 volunteer hours. MDA staff and the camp medical team provide all of the medical training your volunteers, they will acquire a week of experience working with children living with neuromuscular disease, as well as 140 volunteer hours. MDA staff and the camp medical team provide all of the medical training your volunteers, they will acquire a week of experience working with children living with neuromuscular disease, as well as 140 volunteer hours. MDA staff and the camp medical team provide all of the medical training your volunteers, they will acquire a week of experience working with children living with neuromuscular disease, as well as 140 volunteer hours. MDA staff and the camp medical team provide all of the medical training your volunteers, they will acquire a week of experience working with children living with neuromuscular disease, as well as 140 volunteer hours. MDA staff and the camp medical team provide all of the medical training your volunteers, they will acquire a week of experience working with children living with neuromuscular disease, as well as 140 volunteer hours.
